

# Health & Safety Policy Statement

Occupational Health & Safety Management System OHSAS 18001:2007

Graham Hart (Process Technology) Ltd will make proper provision for the health, safety and welfare of its people, visitors and contractors who may be affected by its activities.

Continual improvement will be achieved by implementing an Occupational Health and Safety Management System (OH&SMS), with a commitment to:

- Comply with relevant legal and other health & safety requirements
- Prevent injury and ill health

The policy provides a framework for setting and reviewing OH&SMS objectives. The Managing Director has overall responsibility with delegated responsibility to the Production Manager for the effective implementation of this policy, giving OH&S equal priority with all other business aspects.

Line managers and employees participation in the achievement of this policy will be through:

- Understanding and accepting their responsibility to act safely, adhering to safety rules and defined work methods, using safety equipment provided.
- Undertaking relevant health and safety training and applying their learning in the workplace.
- Involvement in the communication and consultation processes on health and safety matters.
- Contributing to the process of continuous improvement of safe and healthy conditions.

This policy is communicated to all employees, visitors and subcontractors to ensure that they fully understand how they contribute to the effective implementation of our OH&SMS.

This policy is consistent with our Quality and Environmental policies and is available to our customers, suppliers, subcontractors, visitors and to the general public on request. It will be reviewed annually for continuing suitability during formal management reviews.

Full facilities are afforded to customer's representatives and approving organisations in carrying out any assessment of our OH&SMS operation.
