

Environmental Policy Statement

Environmental Management System ISO 14001:2015

Graham Hart (Process Technology) Limited are dedicated and committed to managing its business aspects environmental impacts in a manner which prevents pollution and complies with applicable legal and other requirements.

We are fully committed to comply with the requirements of the ISO 14001:2004, International Standard and to continuously improve the effectiveness of our Environmental Management System.

This policy provides a framework for establishing and reviewing our environmental objectives. These objectives are implemented through management programmes and focus on:

- The effective management of all controlled and hazardous wastes
- An improvement in the energy efficiency of the business

The Managing Director has overall responsibility for the implementation of this policy. The Managing Director acts as the company's Environmental Management Representative.

This policy is communicated to all employees and suppliers to ensure that they fully understand how they contribute to the effective implementation of the companies Environmental Management System.

This policy is consistent with our Quality and Health & Safety policies and is available to customers, suppliers, subcontractors, visitors and to the general public on request. It will be reviewed annually for continuing suitability during formal management reviews.

Full facilities are afforded to customer's representatives and approving organisations in carrying out any assessment of our Environmental Management System operation.

A handwritten signature in blue ink that reads "Chris Hart".

Chris Hart

Managing Director
